

ENVIRONMENTAL COMMITMENT

Grand Bahama Power Company is committed to conducting its business in a manner which is respectful and protective of the environment. The Company assures the environmental integrity of its processes and facilities everywhere it does business at all times.

In delivering on our commitment we:

- Comply with all applicable laws and regulations. We maintain and follow environmental procedures, and compliance with environmental standards is a key ingredient in employee training and performance measures.
- Seek opportunities, beyond regulatory compliance requirements, for reducing risk to human health and environment, and establish our own environmental quality standards where appropriate.
- Employ management systems and procedures specifically designed to prevent activities and or conditions that pose a threat to human health or the environment. We look for ways to protect our employees and the neighboring communities by employing clean, safe technologies and operating procedures. We are prepared for all emergencies.
- Comply with all regulations pertaining to releases to air, land, or water through the safe use of chemicals. We minimize the amount and toxicity of the waste we generate and will ensure safe waste disposal treatment.
- Manage scarce resources such as water, oil, land and forests in an environmentally sensitive manner.
- Communicate our commitment to environmental protection to our employees and all stakeholders.
- Measure our progress on an ongoing basis, and regularly report our progress to our employees and all stakeholders.

Grand Bahama power commits to continuous improvement of its environmental performance.
